Telecommunications and energy for a greener future

NOS AND EDP JOIN FORCES TO OFFER MORE BENEFITS TO CUSTOMERS

- **EDP Comercial is giving discounts to customers for energy and guaranteeing 100% green electricity**
- **NOS is offering the double of mobile data and a discount on the purchase of equipment**
- **Partnership promotes mutually advantageous benefits and contributes towards the common aims of the two companies: environmental sustainability and digital transformation**

NOS and EDP Comercial have joined forces to offer important benefits to their customers while at the same time contributing towards a greener planet, strengthening the values of sustainability that are common to the two companies, in line with the carbon neutrality target of the European Green Deal and the objectives of digital and energy transition in Portugal.

The partnership takes the form of offering customers in both companies the double of mobile data contracted for NOS communications packages and an additional 1% discount for energy services (electricity and gas) contracted with EDP Comercial, with the customers involved provided with 100% green electricity produced from renewable sources, so helping to make a decisive contribution towards decarbonizing the planet.

In the case of new EDP Comercial customers and EDP Pack Living customers, who already have access to additional benefits for energy, leisure and other products, the discount increases to 2% and can reach 8% (depending on the tariff), always with the 100% green electricity guarantee in their homes or businesses. A NOS voucher worth 25 euros for acquiring a smartphone is also granted to these new customers.

The partnership covers private and SME customers of both companies, and has no impact at all on the binding customer loyalty periods for NOS contracts. Activation is 100% digital, which can be done using the NOS app or the EDP Zero app, allowing rapid access to the benefits involved.

According to Daniel Beato, Executive Board member of NOS, *“by fusing the strategic ambition and the energy of these two major Portuguese companies, we have created a movement with unlimited potential. The partnership allows us to ensure that our customers have access to*

COMERCIAL

exclusive advantages in the energy and telecommunications sectors and brings them closer to our vision of a future that is more sustainable in terms of energy”.

For Gustavo Monteiro, Board Director of EDP Comercial, *“this partnership aims at ensuring that customers have an increasingly more complete offer of services that meets their needs and which is also appropriate to the circumstances that our planet is experiencing at the moment. For EDP, it is vital to fight climate change and promote the use of 100% clean energy. The partnership will help customers to accelerate the energy transition and to already change tomorrow today”.*

The two companies have already taken an important step towards energy sustainability on the Iberian Peninsula by announcing last May an agreement to purchase long term renewable energy (PPA – Power Purchase Agreement). Innovative and pioneering in the Portuguese market, this PPA contract, with a value of more than 32 million euros, has a lifetime of more than 10 years and involves the construction of a new wind farm, as well as the supply of 62 GWh of electricity each year, which will enable NOS to have 40% of its business operations supplied by this green energy by 2023.

Partnerships of this size enable investment to be made in new renewable assets, which reduce dependency on fossil fuels and contribute towards the energy transition, a change which NOS and EDP consider to be essential for Portuguese society and crucial on the path towards digital transformation, two areas where the companies aim to be key players.

About NOS

NOS is the biggest communications and entertainment group in Portugal. It offers latest generation fixed and mobile phone, television, Internet, voice and data solutions for all market segments. It is leader in cinema film distribution and exhibition with the greatest number of cinema complexes and cinema theatres in Portugal.

NOS has 5 million mobile phone, 1.7 million television, 1.8 million fixed telephone and 1.5 million fixed broad band Internet customers.
